Title: Radio Frequency Identification Devices, Remote Communication Devices, Identification Systems, Communication Methods, and Identification Methods

VERSION WITH MARKINGS TO SHOW CHANGES MADE TO ACCOMPANY THE PRELIMINARY AMENDMENT

In the Claims

The claims have been amended as follows. Underlines indicate insertions and strikeouts indicate deletions.

40. (Amended) An identification method comprising:

providing a plurality of remote communication devices individually including indication circuitry;

associating the remote communication devices with respective plural objects; outputting a wireless signal to identify at least one object; receiving the wireless signal within the remote communication devices; and

indicating presence of the at least one selected object using the indication circuitry

of the remote communication device associated with the at least one selected object; and outputting another wireless signal responsive to the receiving using the remote

communication device associated with the at least one selected object.

42. (Amended) The method according to claim 40 wherein the indicating includes emitting a human perceptible visible signal.
